

M.Sc(I.T.) 8th Sem
803 Elective: Smart Device Computing using Android
Practical Assignment 1

Submission Date : 7-4-2021

1. Develop an app to take a TextView with some default text and change text color with three different buttons Red, Green and Blue on button click event. Use linear layout.
2. Develop an app showing relevant popup menu on button and open appropriate activities on menu item click. You can use your own creative ideas for the demo.
3. Develop an app for passing first name and last name (using 2 different edittext) from first page to second page. Second page should display combined name with appropriate welcome message. Use intent extra for passing information Eg. ("Hello Niti Mehta" should be displayed on second page in a textview).
4. Develop an application with checkboxes which display total selected items count in a textview on button click.
5. Develop an application to show names of 10 Indian cities into listview using static array and on selection of particular item it should display the name of city in toast. Use custom listview only and not simple listview.
